Amity University Noida

Live Projects

Food ordering App ↗

I'm a developer who...

2+ years of experience in interface/mobile app development across-platform. In my experience, I was able to develop a complete mobile app. I'm passionate about converting the design into code and user experience research to ensure quality.

Experience

Flutter developer @PayNav
Remote (March 2022 - Present)

Freelancer - Flutter developer
Remote (February 2020 - February 2022)

- Followed client's vision and meet their exact needs in order to deliver that dream come true result.

- Completed 10+ real projects in different field.

- Build the client's exact vision into code and quality.

- Provided the best mobile user experience.

- Worked in e-commerce projects.

- Integrate animations into the app projects with the requirement.

- Delivered the most optimized code that improves the performance.

Projects

Project Name	:	**Food Ordering App**
Technology used	:	Flutter, Firebase
Role	:	Developer
Responsibility	:	Handle both frontend and backend, Integrated with Google sheet and Firebase.
Project description	:	Android app for order a food item from the baking industry. List out the available menu, price, image, and description. Customer can order food directly from this app. On another side, there will be an app admin to manage the orders that are coming from the customer, and the order auto-generates orders into the different delivery sheets by the order comes. App work as order receiver and generates delivery sheets for the baking industry.
